

About the Modfin Group

Modfin is an innovator and leading provider of accounting services and financial technology solutions for enterprises of all sizes, across all industry sectors in South Africa. Modfin has established strategic alliances with leading accounting technology providers ensuring that our clients are always ensured of a solutions oriented approach. Modfin strives to provide clients with results and business benefits, helping our clients reduce technology investment costs, decrease risk, improve productivity and increase customer satisfaction.

Each business unit within the Modfin Group is strategically positioned to support their product offering through a team of experienced and highly skilled professionals that offer a combination of intellectual capital and consulting flexibility.

Modfin strives to deliver world-class and cost effective financial solutions to our clients.

Founded in 1996 by Elize Pretorius, the Modfin Group was one of the first companies in the accounting software arena in South Africa with a value-added approach.

Modfin is a leading provider of financial solutions such as

- Payroll outsourcing
- System evaluation
- Financial consultation
- Office Automation
- Outsourced accounting
- Auditing

The Modfin Group aims to provide total satisfaction to their customers by supplying a complete integration of their computing and accounting needs.
